

# Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## United States Equities (the "Fund")

A sub-fund of Santander Premium Fund Sterling Accumulation A Share Class (ISIN: GB0002824448). This Fund is managed by Santander Asset Management UK Limited. This Fund is authorised in the UK and regulated by the Financial Conduct Authority.

### Objectives and investment policy

The Fund's objective is to provide a combination of capital growth (to grow the value of your investment) and income over a 5+ year time horizon. The Fund will aim to outperform (after the deduction of fees) its Target Benchmark (MSCI USA Index TR) measured over a rolling 3 year period. Average outperformance will typically not exceed 0.70% per annum (after fees) measured over a rolling 3 year period. No level of outperformance is guaranteed.

The Fund is actively managed (discretion is used) and invests at least 95% in equities (shares) denominated in or hedged to USD and only in developed markets. Of the Fund's investments at least 80% (typically at least 90%) will be in shares in companies listed, at the time of purchase, in the United States. Up to 20% will be in shares in companies listed, at the time of purchase, outside the United States. The Fund may invest up to 5% in cash, cash like, or other money market instruments. The Fund may use derivatives for Efficient Portfolio Management to reduce risk or cost, or to generate additional capital or income if consistent with the Fund's risk profile, including hedging.

The Authorised Corporate Director (ACD) has appointed a Sub-Investment Manager (Sub-IM) to manage the Fund. Investments will be selected with the aim of achieving capital growth, but some will also provide income. The Sub-IM has a target to outperform the Target Benchmark (before fees) and is aligned with the Fund's investment objectives. In selecting companies, the Sub-IM considers: fairly priced companies leading to strong long term performance; sustainable business models; market themes and trends; and market attitudes to different companies to gain insight into future share performance. The Sub-IM's process takes into account investment restrictions which limit deviation from the Target Benchmark.

The Fund is typically managed with a tracking error (deviation from the Target Benchmark) of up to 4%, which may be higher (e.g. in volatile market conditions) if consistent with the investment strategy. This means that the Fund does not have to invest in the same assets or amounts and may hold significantly fewer assets than the Target Benchmark, some will reflect its constituents. The ACD may consider the Fund's performance against the Target Benchmark when setting remuneration for the individuals responsible for Sub-IM selection and ongoing oversight. The Target Benchmark has been selected as it is representative of the Fund's investment in US companies and broadly in line with the investment policy.

Income arising from your investment will not be paid to you but will be rolled up into the value of your investment. You can buy and sell shares on any business day.

**Recommendation:** This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

### Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

The lowest risk and reward indicator does not mean risk free. The Fund is rated 6 due to the nature of the assets it invests in. The material risks listed below are not adequately captured in the indicator above.

**Counterparty Risk:** A default by a counterparty (including derivative counterparties and any providing a service, e.g. safekeeping of assets) may result in a reduction in the value of the Fund.

**Country Risk:** Investing all or mostly in a single country or region (United States) can be riskier than a fund that invests more broadly.

**Currency Risk:** The value of investments that are not in pound sterling may be affected by changes in exchange rates.

**Investment Style and Management Risk:** The investment style chosen and the assets selected to deploy this style may deliver returns that are inferior to alternative choices.

**Liquidity Risk:** It may be difficult to sell some investments, or to sell them without making a loss which may reduce the value of your investment.

**Stock Market Risk:** The value and income of shares can go up or down. This can be due to changes in how the market views the company, industry, or economy.

The value of your investment and any income is not guaranteed and you may get back less than the original amount you invested. The Fund Prospectus section "Risk Factors" has more information.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

### Charges taken from the Fund over a year

Ongoing charges	0.74%
-----------------	-------

### Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

The Ongoing Charge Figure (OCF) is based on expenses for the half-year ending 30 April 2024 and has been annualised. This figure may vary from year to year.

Transaction costs, which are not included in the calculation of the OCF but are incurred by the Fund when buying or selling investments, may have an impact on performance and are paid from the assets of the Fund.

Our current policy is to charge all fees and expenses to the income of the Fund, and not the capital, other than the costs of buying and selling securities which are charged to the capital of the Fund.

More information about charges can be found in the Fund Prospectus section "Fees and Expenses" and Appendix 1.

## Past performance

Source: FE fundinfo 2025

You should be aware that past performance is not a guide to future performance.

Fund launch date: 18/12/2000.

Share/unit class launch date: 18/12/2000.

Performance is calculated in GBP.

The past performance calculation does not include any entry or exit charges if applicable, but does take into account the OCF and the costs of buying and selling securities.

Whilst the Fund is managed with reference to the Target Benchmark, it does not track an index.

The Benchmark was changed from the FTSE USA Index to the MSCI USA Index TR on 7 July 2021. However, the graph displays the past performance of the Fund and the MSCI USA Index TR only. The Benchmark was also reclassified from Constraint to Target. Prior to 7 July 2021 the Fund was not aiming to outperform the Benchmark.
